## FULL STACK DEVELOPER

Self-taught **Python Django Full Stack Developer** passionate about building scalable, user-centric web applications. Proficient in end-to-end development — from responsive UI design to secure backend integration and cloud deployment. Seeking an opportunity to contribute to impactful products while continuously growing as a developer.

## SKILLS

**Languages** : Python , JavaScript, HTML, CSS , C

**Frameworks** : Bootstrap, Django

**Database / ORM** : PostgreSQL, Django ORM

**CS Fundamentals**: Data Structures (Arrays, Linked Lists, Stacks, Queues, Sorting)

**Tools / Platforms** : VS Code, Git, GitHub, Figma, AWS, Render

**Soft Skills** : Problem Solving, Communication, Team Collaboration, Adaptability, Time Management, Leadership

## PROJECTS

### Liora Code

*HTML, CSS, JavaScript, Bootstrap, Django, PostgreSQL, Git, AWS*

[Live](#)

- Designed and built a full-fledged **e-commerce platform** for formal wear with cart, wishlist, and coupon systems.
- Integrated **Razorpay** for secure online payments and added automated **email confirmations** on order success.
- Implemented product **color and size variations**, ensuring accurate inventory display and selection.
- Integrated **Razorpay** for secure online payments and added **email confirmations** upon successful order placement.
- Implemented **product variations** (color/size) and category-based offers to enhance user engagement.
- Enabled **admin PDF reports** for sales tracking and **dynamic banner management** for marketing flexibility.
- Delivered a **fully responsive interface**, optimized for both desktop and mobile users.
- Built a **dedicated admin dashboard** to manage **products, categories, inventory, banners, offers, and coupons**.
- Enabled **role-based access** control for secure operations and efficient backend management.
- (Demo admin credentials available upon request.)

### Employee Management Code

*HTML, CSS, JavaScript, Django, MySQL, ORM, Git, Render*

[Live](#)

- Developed a web-based HR management system to handle complete employee data operations.
- Features include adding, removing, and viewing employee records, ensuring **streamlined workforce management**.

### Inked Code

*HTML, CSS, JavaScript, Django, SQLite, CKEditor, Git, Render*

[Live](#)

- Created a **full-featured CRUD blog** application with authentication and author-specific content management.
- Integrated **rich-text editor (CKEditor)** for post creation and **like/bookmark functionality** for engagement.
- Built author profiles with **subscription** features for a personalized user experience.

## EDUCATION

### **APJ Abdul Kalam Technological University** *Bachelor of Technology in Information Technology*

Thiruvananthapuram, Kerala, India  
Aug 2017 – Jul 2021

- CGPA: 6.78/10
